Our mission is to help Animal Health Companies and Veterinary Businesses acquire top talent which helps them increase their bottom line on a global basis, while helping Animal Health Industry and Veterinary Professionals attain career-enhancing opportunities that allow them to achieve the quality of life they seek. We partner with organizations who have critical hiring needs to hire Animal Health Industry and Veterinary Professionals.

With our singular focus in the Animal Health, Animal Nutrition, Animal Science and Pet Products Industries and The Veterinary Profession; there is no recruiting firm better connected in this market. Whether you need to hire one person or a team of people, or are looking to make your next career move, no one can help you achieve your goals faster and more effectively than The VET Recruiter®.

Your organization should use a search consultant because the best people aren't looking for a new position. They are already gainfully employed. These are typically the proven performers who are in the top five or ten percent of their profession. They don't usually read the "Help-wanted" ads, they don't keep their resumes circulating and they don't visit employment agencies. Identifying and approaching these hidden prospects is not an easy task, but that's what trained search consultants do every day. A recruiter can also preserve your anonymity when it is critical to do so.
